Call for Workshops, Tutorials and Demonstrations Proposals

The 9th International Conference on Web Intelligence, Mining and Semantics (WIMS'19) will be hosted by the Department of Computer Science and Engineering, Chung Ang University, Seoul, Korea. Its organizing committee invites proposals for workshops, tutorials and demonstrations (on new applications) to be held in conjunction with the conference. The overall purpose of workshops and tutorials is to provide participants with the opportunity to present and discuss novel research ideas in areas of Web intelligence, Web mining and Web semantics, with a particular emphasis on the fundamental interaction between these vibrant fields of research and development. The purpose of demonstrations is to provide developers with a place to showcase new practical and innovative implementations of state-of-the-art systems in areas of interest to the Web Intelligence and Semantics community.

Workshops and tutorials provide a forum for an intense and focused scientific exchange amongst researchers and practitioners interested in a particular topic and a meeting venue for the community. Organizers may structure workshops/tutorials as they see fit, possibly including invited talks, panel discussions, presentations of work in progress, peer-reviewed papers, demonstrations, or some combination. A workshop/tutorial could be scheduled for half a day or a full day, depending on potential interest and organizers' preference.

Workshops, tutorials and demonstrations should address topics that satisfy the following criteria:

- The topic falls in the general scope of WIMS 2019 (see the Call for Papers),
- There is a clear focus on a specific theme, technology, problem, or application,
- There is a sufficiently large audience interested in the topic.

The organizers of accepted workshops and tutorials will be responsible for their own reviewing process, website, arranging invited speakers and coordinating the collection and delivery of camera-ready material.

There is an opportunity for papers accepted in workshops/tutorials/demonstrations to be published in the WIMS'19 proceedings and disseminated through the ACM Digital Library, provided they follow the ACM submission guidelines and template, and adhere to camera-ready submission and registration deadlines set for the main conference (for tutorials/demonstrations, the papers can be based on the proposal). Selected extended papers will be invited to appear in a special issue of a reputed journal in the field.

Proposal Details

Proposals should not exceed 4 pages in length. They should contain the following information:

- Title of the workshop/demonstration/tutorial
- Name, affiliation, postal address and email of contact person
- Names and affiliations of organizers
- A 150-word abstract
- Aims and scope
- Important dates (for workshops)
- Description of the proposed workshop/tutorial/demonstration
- Estimated duration (short, half day, full day, etc.; if possible please give an estimated number of hours)

Proposals in PDF format should be submitted via email to the workshop and tutorials chairs.

Workshop & Tutorial Chairs

- Xin Su, Hohai University, China
- Bay Vo, Ho Chi Minh City University of Technology, Vietnam

Important Dates

January 18, 2019

Submission of tutorial and workshop proposals

January 25, 2019

Notification of acceptance for tutorials and workshops
